This should include appointments from both external and internal sources such that if an existing employee is appointed to another role within the organisation (promotion or not), they would need to be included.

Gender equality indicator 2: Gender composition of governing bodies

2 Your organisation, or organisations you are reporting on, will have a governing body/board as defined in the Workplace Gender Equality Act 2012 (Act). (In the Act, a governing body is defined as “the board of directors, trustees, committee of management, council or other governing authority of the employer”.) For the purposes of reporting under the Act, this question relates to the ultimate or ‘highest’ governing body for your organisation. NB: if your governing body/board is located overseas, it still needs to be included.

- For private or publicly listed companies, you will have one or more directors or a board of directors.
- For trusts, the trustee is the governing body/board.
- For partnerships, the governing body/board is likely to comprise all or some (if elected) partners.
- For organisations whose governing body/board is the same as their parent entity’s governing body/board, it is still deemed to have a governing body/board.
- For religious structures, you may have a canonical advisor, bishop or archbishop.
- For other structures that do not fall into any of the above categories, your committee of management would be considered your governing body/board.

2.1 Please complete the table below, ensuring data entered is based on the instructions in each column header. For each organisation, enter the number of women and men on that governing body/board (not percentage). If a target has been set to increase the representation of women on any of the governing bodies listed, please indicate the % target and the year it is to be reached.

If your organisation’s governing body/board is the same as your parent entity’s governing body/board, you will need to enter your organisation’s name but the details of your parent entity’s governing body/board in the table below.

| | Organisation name | Gender and NUMBER of chairperson/s (NOT percentage) | Gender and NUMBER of other governing body/board members (NOT percentage) | % target for representation of women on each governing body/board | Year to be reached |

2.5 Should you wish to provide additional information on any of your responses under gender equality indicator 2, please do so below:

Although women are well represented across all management groups (80%), Healthscope resolved to extend this representation at a board and senior executive level through the setting of diversity targets and strategies to facilitate and address impediments to greater gender diversity in management and leadership roles.

To this end the board resolved to:

- Adopt the AICD recommended target for ASX200 companies to achieve 30% female directors by the end of 2018
Status: sound progress to achievement with the appointment of an additional female member to the Board of Directors in March 2016.
- Maintain female participation in FY16 at no less than 50% in Healthscope's key leadership development programs.
Status: Achieved over 85% participation
- Achieve at least 50% female representation amongst participants in Senior Executive recruitment in FY16, with a long term goal to achieve 50% female representation in Senior Executive.

(As with all of the questions in this questionnaire, any information you provide here will appear in your public report.)

A key initiative in March 2016 was Healthscope's 'Your Voice Counts' employee engagement survey that invited over 15 000 staff across Australia to express their views about their work and their workplace. Specific questions targeting employee's experiences with gender equality within Healthscope and other related questions were included. Preliminary analysis of the findings indicate that over 85% of survey respondents reported that their manager genuinely supports equality between genders in the workplace and over 90% positively responded that sex based harassment is not tolerated in their workplace.

Further analysis of the results is currently underway and findings specific to gender demographics across all survey categories will provide valuable information for Healthscope to understand our employee's experience of gender equality in the workplace and to identify the key areas/issues to its workforce in order to promote and improve gender equality across its operations.
