Healthscope hands over Mount Private to Bethesda Health Care

Healthscope will officially hand over management of Mount Private Hospital to Bethesda Health Care this week.

Mount Private Hospital has served the community in Perth and beyond for over 80 years and under Healthscope's stewardship, has become one of Perth's leading private hospitals.

Pioneers in delivering high-quality, innovative healthcare, The Mount was the first private hospital in WA to offer transcatheter aortic valve replacement (TAVI), performing over 1100 procedures since it began in 2017. It has also built a strong capability for robotic surgery.

Healthscope CEO Nicole Waldron commented *"The Mount is an exceptionally high performing hospital, which has led the way in providing high-quality acute care to Perth and its surrounds."*

"The hospital's strong reputation, reflected in its consistently high patient experience scores, is testament to the excellent care our people and doctors provide to their patients."

"The Mount has a bright future ahead of them under Bethesda's ownership and we wish them all the best."

Bethesda Health Care CEO Dr Neale Fong said Bethesda is pleased to see The Mount's services continue under Bethesda's management and combine their long histories of providing high-quality health care in WA.

Dr Neale Fong said: *"Our commitment is straightforward: continuity, stability and a strong focus on care. We are proud to welcome The Mount into the Bethesda family and look forward to building on its strong reputation, supporting its people and doctors, and continuing to provide outstanding care to patients and the wider community."*

Mount Private Hospital will transition to Bethesda Health Care on 24 September when it will be known as Bethesda Mount Hospital.

Mount Private Hospital is a 224-bed acute private hospital, centrally located at the foot of the beautiful Kings Park on Mounts Bay Road. It offers a broad range of surgical and medical services.
